

Features

- Top box manufactured from 3mm mild steel, totally covers hitch handle.
- Lower 'U' channel 3mm thick steel covers hitch fixing bolts.
- Dummy ring hitch plate to cover hitch socket opening when securing trailer/caravan in Un-hitched state.
- When hitched to car hitch lock can be used to prevent uncoupling when parked at service station etc.
- Utilises Bulldog Super Bolt 1" (25.4mm) case hardened steel locking pin, drill & pick resistant.
- All models finished in a durable red powder coated finish.
- Can be used in conjunction with the Bulldog Lock Posts to provide added security.
- Independently attack tested and approved by Sold Secure. Insurance Approved.
- Minilock principle does not just cover the handle from above but instead features a 3mm thick bottom channel which wraps itself around the underside of the drawbar making it far more resistant to leverage attacks than many competitors.
